To,

**All Empanelled Health Care Providers**  
**Public/Private, Madhya Pradesh**

**Subject:** Revised Guidelines for Image Upload with Treating Doctor or Hospital Superintendent for Dialysis Patients.

In light of the high number of dialysis patients and to streamline the process for the ease of hospitals and patients, the State Health Agency (SHA) has decided to revise the requirements for uploading patient images during treatment under the Ayushman Bharat “Niramayam” scheme. This policy aims to reduce the procedural burden on dialysis patients while maintaining the required documentation standards under the scheme.

**Policy Update:**

**1. Revised Image Upload Requirement:**

Hospitals can now upload the image of the dialysis patient either with:

- The **Treating Doctor**, or
- The **Hospital Superintendent**.

This modification is aimed at simplifying the process while maintaining compliance with scheme protocols.

**2. Applicability:**

This policy is specifically applicable for dialysis patients only, considering the high volume and recurring nature of their treatments.

**3. TPA and Hospital Responsibilities:**

- All hospitals and Third-Party Administrators (TPAs) must ensure compliance with this revised guideline.
- The uploaded images must be clear, accurate, and as per the quality standards mandated by the SHA/NHA.

These revised guidelines are effective immediately and must be adhered to without exceptions. Hospitals and TPAs are directed to comply with all additional guidelines and instructions issued periodically by the SHA/NHA to ensure seamless service delivery and accountability.
